Subject: Grouping the CZARA Forestry - Riparian public comments
Attachments: Forestry categories.docx

In preparation for developing summary comments, and then "responses" to the summary comments, I am proposing the following "Categories" for the comments. See the attachment.

Please let me know your thoughts on these. FYI, I will be out of the office at an OWEB Board meeting most of next week so I won't be working on this until next Friday. If you could get me your thoughts by then, that would be great.

Thus far we have:

1. Completed our review of the F-R comment letters;
2. consolidated our collective review comments into one spread sheet;
3. proposed "categories" for summarizing our comments; and
4. developed a draft issues document (which you all provided comments on this week).

The draft issues document will be discussed by the core CZARA team next Tuesday. This document will be the foundation for presenting this issue to NOAA/EPA managers in August.

When I return next Friday, I will begin working on putting comment letter summaries together and coding the specific comments. Once that is completed we'll begin drafting summary responses to the comments.

Give me a call if you have any questions.

Alan
